

Ideal for overpacking damaged drums for transport.

Three hundred and sixty litre overpack salvage drum is the safe and economical solution to the transport and temporary storage of damaged or leaking drums of hazardous materials. Rugged, UV-protected polyethylene withstands the rigours of land, air and sea transport. "X" rating offers the highest UN and DOT certification available – can be used with all packing classes of hazardous materials I, II, and III including solvents, acids, poisons and explosives.

One-hundred percent polyethylene construction provides superior chemical resistance and durability for a variety of uses such as collection and transport, emergency response, contamination site clean-up and spill control kits. Twist-on, threaded lid makes closure safe and easy with no separate, troublesome metal band needed. Relocation is simple via forklift from any one of three positions. Units nest when empty for compact storage.

UN Marking 1H2/X340/S

Gator® Overpack Salvage Drum

Description	Capacity (Litres)	Outside Dim. OD x H	Compliance	Model No	Delvr Wt (kg)
Overpack salvage drum	360	787 x 1099 mm	DOT, UN	28201	21.0

Environmental Products

FOR SPILL CONTAINMENT

Maximum performance is assured with independent, third party certification for United Nations transport of hazardous materials. Complies with US Department of Transportation 49 CFR 173.3(c)(1). Also certified to International Maritime Organisation (IMO), International Civil Aviation Organisation (ICAO), and International Air Transport Association (IATA).

Safe, effective and economical spill control for 200-litre drums.

Collection centres are constructed of all-weather, chemical-resistant Gator-Tuff polyethylene to contain spills and stand up to the harshest environments. Fork-liftable for easy relocation.
